PRODUCT WALKTHROUGH

Wallet to bank in six steps.

One guided flow. You stay in control of your wallet from the first click to the bank payout.

PHANTOM · SOLFLARE · USDC ON SOLANA · USD · GBP · INR · PHP

STEPS 1–3

Connect, choose, see the full quote.

01 

Connect your wallet

Sign in with Solana: one message signature, never a transaction or key.

LIVE

02 

Choose amount and country

Pay in USDC, or any supported token swapped by Jupiter.

LIVE

03 

See the full quote

2% LamportPay fee, partner and network fees, exact payout.

SANDBOX

STEPS 4–6

Verify once, sign once, track to the bank.

04 **Verify once**
Hosted KYC with our licensed partner, Stables. We store no ID documents.
SANDBOX

05 **Sign one transaction**
Settlement to the partner's single-use address, fee to ours. No custody.
SANDBOX

06 **Track to the bank**
Live status from the partner, and a receipt for every payment.
SANDBOX

PAYMENT TRACKING

Know where your money is, at every step.

PAYMENT · USDC → INR

SANDBOX

- **Quote confirmed**
  Every fee shown before signing
- **Signed in your wallet**
  One user-signed transaction
- **Deposit detected on-chain**
  Solana confirmation
- **Converting and paying out**
  Status from the licensed partner
- **Paid to bank · receipt**
  Completed when the partner confirms

LamportPay

Try the flow end to end.

The full journey runs today on Solana devnet and our partner's sandbox. No real money moves.

OPEN THE DEMO → LAMPORTPAY.COM

First 10 early-access users pay **zero LamportPay fee** at launch.

Mainnet follows an independent security audit and a controlled real-money test.
