CASHING OUT CRYPTO

3 common ways to cash out. Only one keeps you in control.

A quick, honest comparison for anyone paid in crypto.

OPTION 1 · P2P MARKETPLACES

You trade with a stranger.

Counterparty risk
You depend on the other side to pay

Payment disputes
Proof of payment, waiting, chasing

Rates vary trade to trade
Hard to know the real cost

OPTION 2 · EXCHANGES

You hand over custody first.

Deposit to the exchange
Your funds sit in their wallet

Trading + withdrawal fees
Several steps, several costs

Withdrawal delays
Hours to days before the bank sees it

OPTION 3 · LAMPORTPAY

Your wallet. Your control.

Non-custodial

Funds move only when you sign

Full quote first

2% LamportPay fee, partner and network fees, exact payout

One signature

Wallet → licensed payout partner → bank

SIDE BY SIDE

The difference.

	P2P	EXCHANGE	LAMPORTPAY
Who holds funds	Counterparty	Exchange	**Nobody · you sign**
Cost visible first	Varies	Partly	**Yes, every line**
Steps to bank	Many	Many	**One signature**
KYC	Varies	Exchange	**Licensed partner**

Crypto in. Local money out.

Non-custodial

Full cost before you sign

Licensed payout partner (Stables)
